What teachers say

BondBuilder & TableTrainer and Mental Maths Challenge are your strongest products used in the proper way - with home access. I believe they can make a massive difference to maths teaching - if it's done properly and coordinated as a whole school with parental involvement.

- Clint Lees, Robert Wilkinson Primary School, York

The verdict from staff who explored NumberGym is 'fantastic', 'well-differentiated', 'attractive visuals', 'appropriately challenging', 'we love it', 'pupils prefer it to previous software used'.

- Fiona Reid, CarronGrange School, Falkirk

NumberGym Maths - now available on iPads and other devices

We are very proud to announce that Bond Builder, Table Trainer and Mental Maths Challenge are now available in HTML5. This makes them accessible from any platform.

To access this new version, simply click on the Online Access link above.

We are now converting The NumberGym's Challenges and Teaching tools from Flash to HTML5. Here's the first one - try it out:

3. Enter the schools login details. Username: his Password: park
4. Click the orange arrow.

NumberGym Maths

Enter your school login and password: his

...

→

5. Choose an area of learning by clicking on it. Your child's class teacher will direct you to an area.

6. If you clicked Bond Builder, Table Trainer or Mental Maths Challenge, it will ask you to enter student login. Children will have to enter their personal login. This enables teachers to track how quickly children have completed the task. Most children's login details are the first 3 letters of your child's surname followed by the first 2 letters of their first name. Parents have been informed if their child's login is slightly different.

Example

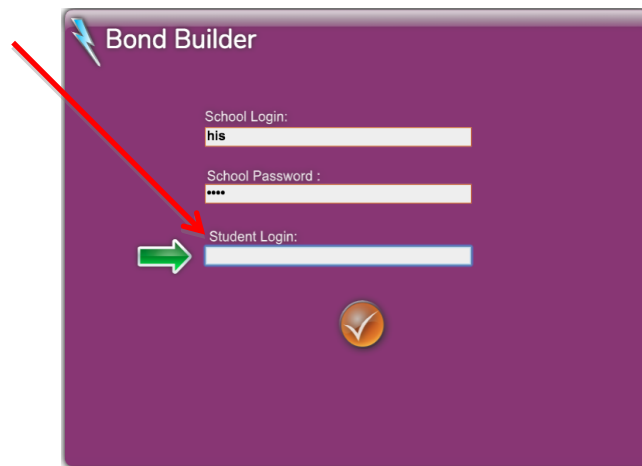

Rachel Bateson's login would be:

School login: his

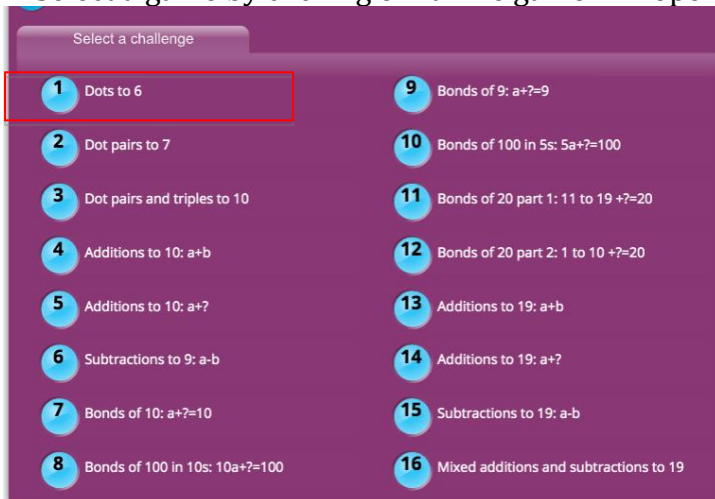

School password: park

Student login: batra

All login details are lower case.

7. Select a game by clicking on it. The game will open.

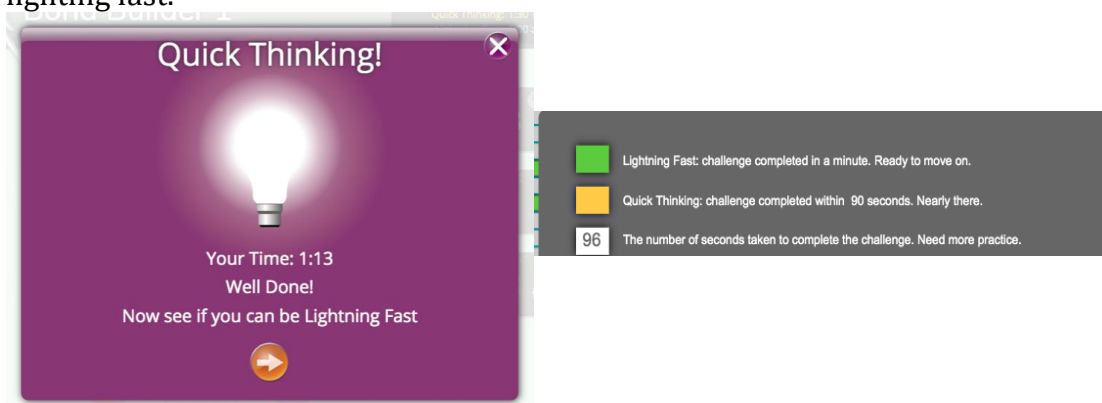

8. Click the green button.

9. For most of the games, you have to click on the 'card' (on this game the blue square with dots on) and drag it to the answer.

10. Once you have completed a game, a purple box will pop up telling you how you did (see key below). Click the 'x' button to do it again even if you were lightning fast.

Notes

- NumberGym Maths supports the teaching of Mastery in Maths and your child's teacher will be able to track their personal progress to support their future learning with this programme.
- Please keep these login details safe.
- Individual games are available from the Apple App Store for a fee (£1.99 each). This will allow children to play on iPads. Please see below.
